

H₂Owl

H2Owl, our water-conservation mascot, can visit your school or organization. Please call the District for details.

SAVING FOR A ~~DRY~~ RAINY DAY

Some people save for a rainy day. We help our member cities save for a **dry** day.

The San Gabriel Valley Municipal Water District's mission is to make sure the water of its member cities is safe and healthy, in good supply, and priced fairly. As we face record drought conditions, the District remains a source of supplemental water for its member cities, serving much like a "water insurance policy." The District encourages residents and businesses to celebrate Water Awareness Month by learning what one person can do to save water (and money) every day.

WHAT ONE PERSON CAN DO TO SAVE WATER

Saves 0-25 Gallons/Day

Install faucet flow restrictors, low volume toilets and water-efficient appliances

Repair leaks in inside plumbing and external sprinkler systems promptly

Turn off the faucet when washing dishes, brushing teeth or shaving

Use a broom instead of a hose to clean driveways and sidewalks

Saves 25-50 Gallons/Day

Use a shut-off nozzle & water bucket to wash your car

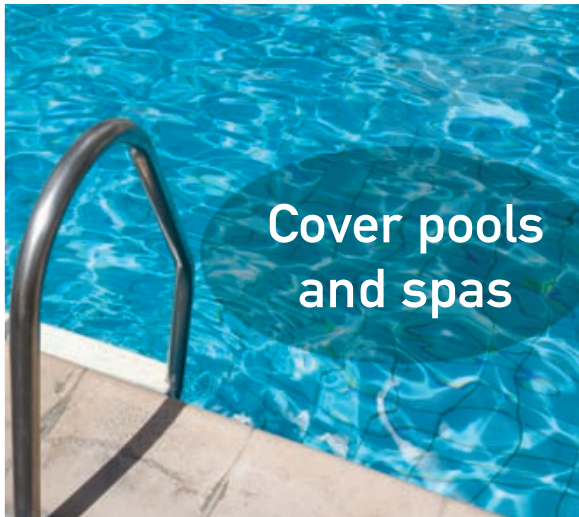

Water lawn & plants in cooler morning or evening hours

Take shorter showers

Cover pools and spas

Saves 50+ Gallons/Day

Install drip irrigation systems, rotating sprinkler nozzles and "smart" sprinkler controllers

Landscape with drought-tolerant plants

Support efforts to expand water recycling and use of reclaimed water

Run only full loads in the dishwasher and washing machine

You Can Save Water at Work Also!

Whatever the size of your company, whatever your job, one person can make a big difference. These tips help one person save 25-50 gallons of water per day at home. Imagine the hundreds and thousands of gallons per day that can be saved at work if we all work together!

The District is led by a 5-member Board of Directors elected by residents of the four cities.
